MITSUBISHI ELECTRIC HYDRONICS & IT COOLING SYSTEMS S.p.A.

PROCESS COOLING

PRODUCT OVERVIEW

- **CHILLERS**
- **HEAT PUMPS**
- > UNITS FOR SIMULTANEOUS AND INDEPENDENT PRODUCTION OF HOT AND COLD WATER
- **ROOFTOP UNITS**
- **AIR HANDLING UNITS**
- > CONTROL, SUPERVISION AND OPTIMISATION SYSTEMS
- > ANCILLARY PRODUCTS

CLIMAVENETA'S MISSION

Climaveneta's mission in process cooling is to provide high performing, resilient, and reliable cooling solutions in all production, conservation, storage, and logistics applications where cooling systems are critical for productivity and sustainability.

Climaveneta, as a brand of Mitsubishi Electric Hydronics & IT Cooling Systems Spa, is aware of the important role cooling systems play as well as of their peculiarities and challenges in each type of process application.

From the correct conservation of perishable goods and the effectiveness of specific manufacturing phases, to the potential economic and environmental benefits resulting from free cooling

and heat recovery, process cooling represents one of the strongest and most consolidated segments where Climaveneta units are employed. Vast experience, profound know-how, and the capability to combine the highest standards of manufacturing and operational quality with flexible, customized solutions are the key distinctive factors that make Climaveneta solutions the preferred choice in the most challenging and innovative process cooling projects worldwide.

Highest manufacturing quality standards & tailor-made solutions

All air units up to 100.000m³/h

air flow

Extensive range of chillers and multiuse units from 1 to 4.200kW

12 specialized manufacturing hubs

Comprehensive portfolio of proprietary

& patented technologies

Worldwide distribution and service network

■ Sales network

Manufacturing hubs or R&D labs

Dedicated products & specialised solutions

7 R&D

and testing labs in Italy, China and India

Climaveneta range of dedicated process cooling solutions are designed to deliver even in the most challenging projects:

Smart Integration of the most advanced technologies

Highest industrial quality also in bespoke solutions

Complete Reliability

The extensive experience in the peculiarities of process cooling applications allows Climaveneta to offer the smartest combination of the most advanced technologies such as: full inverter concept, free cooling, heat recovery management, and evaporative cooling.

The Climaveneta approach, by combining the highly industrialized organisation with the widest range of versions, configurations and bespoke solutions, offers complete flexibility in the product proposal with all the advantages of the highest standards of product manufacturing and quality testing.

Thanks to high quality components and materials, and continuous improvement programmes aimed at cutting maintenance costs and ensuring 24/7 premium performance.

High Efficiency

The smartest use of energy

Increased sustainability

Guaranteeing that the HVAC system always runs at the highest efficiency, through a strong focus on premium performances and the implementation of advanced plant room control and optimisation software.

Integrated in the cooling system, advanced heat recovery systems provide an innovative look at heat rejection as a free source of energy for adjoining applications. Intelligent energy management is also crucial for sustainability, considering the extensive use of energy and levels of CO₂ emissions in industrial processes.

CHILLERS

- Highest energy efficiency
- Perfect indoor climate control
- Lowest noise emissions

Air cooled chillers

Water cooled chillers

Condenserless chillers

Air cooled chillers with free-cooling technology

${ t G05}$ SERIES $/{ t C}$ Air and water cooled chillers with R513A

ADVANCED TECHNOLOGIES FOR HIGH EFFICIENCY AND HIGH QUALITY AIR CONDITIONING SYSTEMS

Climaveneta's leadership in air conditioning and heating is backed by over 45 years experience in the smart integration of premium technologies for the most challenging projects worldwide

R R513A

Magnetic Levitation

An extended range of chillers with magnetic levitation centrifugal compressors from 200kW to 4MW, both air source and water source, available also in free cooling and evaporative free cooling versions, to deliver highest efficiency in every application.

HEAT PUMPS

- Operating limits up to -20°C
- Hot water production up to 78°C
- Highest energy efficiency

Air to water reversible heat pumps

Air to water heat pumps (heating only)

Water to water reversible heat pumps

Water to water heat pumps (heating only)

Water to water heat pumps reversible on the hydraulic side

R R513A **G05 SERIES** Air and water source heat pumps with R513A

An innovative heat recovery system that allows the smart use of rejection heat from the industrial process for comfort heating and other neighbouring applications.

Smart Thermal Energy Management

Inverter Driven Compressor

The possibility to modulate cooling capacity results in increased efficiency as well as in the possibility to effectively implement smart management solutions such as active redundancy.

New G04 and G05 Series using green refrigerants

Following on vast experience in using green refrigerants, Climaveneta has already employed extensively green HFO refrigerants such as HFO1234ze and R513A in many ranges. in order to continue to be at the forefront with green best practices.

UNITS FOR SIMULTANEOUS AND INDEPENDENT PRODUCTION OF HOT AND COLD WATER

- Smart heat recovery of the thermal energy from the cooling process
- ▶ Easy integration with process HVAC plants

VPF

The VPF (Variable Primary Flow) dynamically optimizes the unit's thermoregulation for variable flow operation, thus ensuring both the highest pump energy savings and chiller stable operation.

High Water Temperature

Climaveneta vast experience in high leaving water temperature applications is proven by a complete range of technical solutions in these areas, to cope with any heating requirement, from 6 pipe applications to high temperature heating.

Variable Air F

V-AIR

High efficiency EC technology fans are extensively adopted for their advantages with 15% energy reduction compared to traditional EC fans.

AIR HANDLING UNITS

- System's integration and reduced on-site operations
- Ideal for handling large air volumes in all kinds of applications
- ▶ Fully configurable according to the HVAC requirements

Configurable air handling units

WIZARD fully configurable air handling units 600 > (115400

CONTROL, SUPERVISION AND OPTIMISATION SYSTEMS

Group devices

ClimaPRO Plant Room Optimisation System

Plant Room Optimiser for real time, smart management of energy indeces for the single units and the entire plant room.

MANAGER 3000 Specialized group control.

SEQUENCER

The ultimate solutions for supervision, remote monitoring, service, and preventive maintenance.

Supervision and monitoring systems

▶ IDRORELAX Monitoring and supervision system.

Human Machine Interfaces

► KIPlink

Control interface for smart phones and tablets.

ANCILLARY PRODUCTS

Remote condensers

NHCR / NCE / FCE 7,90 > 400 600 800 kW

Proprietary Control Logics

The performance of Climaveneta units is enhanced also by their control logics, based on a proprietary logics and know-how, deployed in a vast range of solutions.

Leading Heat Recovery Technology

Climaveneta is a recognized leader in heat recovery applications and in its product employs in the most effective way all the most performing solutions such as thermodynamic, plate and rotary heat recovery as well as refrigerant booster.

Configurable Efficiency Set

The willingness to cope even with the most demanding energy efficiency projects is reflected by the availability of 3 energy efficiency standard configurations in most hydronic units.

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.
