

**MITSUBISHI ELECTRIC
HYDRONICS & IT COOLING SYSTEMS S.p.A.**

PROCESS

CHILLERS

NECS-Y / NX-Y

**NEW GENERATION OF AIR COOLED
CHILLERS FOR IT COOLING APPLICATIONS.
CAPACITY RANGE 39-885 kW,
SCROLL COMPRESSORS AND R410A**

NECS-Y / NX-Y

HIGHEST PERFORMANCE
IN ANY PROCESS ACTIVITY

Air source chillers for outdoor installation from 39 to 885 kW

Outdoor unit for the production of chilled water with hermetic rotary scroll compressors, eco-friendly refrigerant R410A, axial-flow fans, plate or shell & tube heat exchangers and electronic expansion valve.

The range consists of 4 versions from 2 to 8 compressors in single-circuit or multi-circuit configuration.

THE PERFECT SOLUTION FOR PROCESS COOLING

In industrial processes a certain amount of heat is produced due to friction or process heating. Chillers employed in industrial applications remove this heat and through extremely reliable components they maintain appropriate temperature levels 24 hours a day, seven days a week.

PROCESS COOLING APPLICATIONS

- ✓ **Food industry**, where special attention is paid to safeguarding all the organoleptic properties of the products.
- ✓ **Chemical and Pharmaceutical**, during crystallization at low temperature or liquid cooling after sterilization.
- ✓ **Printing industry**, removing the heat generated by the friction of the printing rollers and cooling down the paper after it comes out of the ink drying ovens.
- ✓ **Plastics**, controlling the temperature of the molding process.
- ✓ **Winery**, keeping cooling in the fermentation stage.

Cooling dependability and extended lifetime

Designed for continuous operation, NX-Y and NECS-Y ranges meet the needs of the uninterrupted industry. Devoted devices and functions maximize the unit's uptime even in case of emergency circumstances.

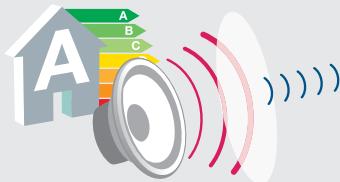

Reduced operating costs

Each component of NX-Y and NECS-Y ranges has been selected to ensure long life cycle and keep performance unchanged over time. This leads to reduced maintenance costs and higher energy saving throughout the whole unit's lifetime.

VERSIONS

NX-Y	0152P-0812P	39,2-227 kW	39,2 ▶	◀ 227							
NX-Y	0614P-1214P	159-327 kW	159 ▶	◀ 327							
NX-Y	0614T-1214T	159-352 kW	159 ▶	◀ 352							
NECS-Y	0202T-0612T	47,8-159 kW	47,8 ▶	◀ 159							
NECS-Y	1314-3218	334-885 kW	334 ▶	◀ 885							

Maximum reliability, production of the cooling energy by using multi-circuit and multi-compressor systems, unbeatable energy efficiency, system simplification: these are the advantages of the NX-Y and NECS-Y ranges.

HIGHEST ENERGY EFFICIENCY

When energy efficiency is key, Climaveneta NX-Y/CA represents the best solution in terms of top level performance. With Eurovent class A EER values, calculated on the basis of the restrictive European standard EN14511, NX-Y/CA ensures the highest efficiency values in its category.

NX-Y/CA also features three different versions with regards to sound emissions. In addition to the standard version, two further versions can be selected, LN-CA and SL-CA, which reduce noise by up to 10dB(A) while maintaining the same energy efficiency class.

MAXIMUM RELIABILITY

Unit with multi-circuit chilling section (two to four, depending on the size) designed to ensure maximum efficiency both at full load and part loads, which assures uninterrupted service in the event one out of the two circuits is disrupted.

The number of compressors also ensures an accurate multi-step management of the cooling capacity provided by each unit in order to precisely meet the most demanding needs of the industrial applications.

LOWEST ENVIRONMENTAL IMPACT

The new NX-Y range uses microchannel aluminum condenser coils on all units.

This means less refrigerant is needed compared to traditional copper coils, ensuring the lowest possible ratio between the refrigerant volume and the cooling capacity delivered, making this product range unique in its reference market.

The result is the ability to provide high cooling capacity units while completely respecting the environment.

EXTRA DURABILITY

Particular attention has been paid to the unit's intensive use (24/7) and long-lasting operation.

Top-quality components and dedicated features such as Fast Restart or the Double power supply are key for an uninterrupted operation of the chiller under any unexpected circumstance.

ABSOLUTE INTEGRABILITY

The availability of pumps and built-in water tanks reduce installation activities. The integrated hydronic module incorporates all the hydraulic components, thus optimizing installation space, time, and costs. All the units can be equipped with a multi-circuit shell and tube heat exchanger, designed and manufactured internally, with low pressure drops, ideal for use with particularly hard water or for serving indoor units.

TECHNOLOGICAL CHOICES

FULL-ALUMINUM COIL

The new NX-Y range uses microchannel aluminum condenser coils on all units. This means less refrigerant is needed compared to traditional copper coils, ensuring the lowest possible ratio between refrigerant volume and cooling capacity. Better resistance to corrosion is a key feature of this coil, ensuring a longer unit life cycle.

The reduction in weight achieved by using this technology also means the units can be handled more easily and safely, thus overcoming specific construction restrictions or limits in the positioning and installation of the unit.

BUILT-IN HYDRONIC MODULE

The integrated hydronic module incorporates all the hydraulic components, thus optimizing installation space, time and costs.

On all versions it is possible to select single or twin pumps suitable for low and high pressure according to the installation needs.

All the units can be equipped with a multi-circuit shell and tube heat exchanger, designed and manufactured internally in order to serve indoor units.

The shell and tube exchanger can achieve the highest flexibility during the unit installation, keeping the efficiency at the maximum level.

EXCELLENCE IN RESULTS

Compliance with the strictest European standards

The distinguishing feature of the new NX-Y units regards the calculation methods used to define the energy efficiency values. These values are now not only based on the capacity delivered and power consumed by the unit, but also taking into account heat exchanger pressure drop, or the available pressure head if the unit is installed with pumps, as required by European standard EN14511. In this way, energy efficiency is no longer an index for evaluating the unit alone, but rather extends the assessment by considering the unit within the system, consequently taking into account the energy required to pump the refrigerant or heat carrier fluid used in the system.

All NECS-Y units, as well as the complete range of Climaveneta air cooled liquid chillers up to 1.500 kW, are certified by the Eurovent program for units with capacities over 600kW. Climaveneta brand products are among the few units which participate in this non compulsory certification program.

This is consistent with Climaveneta's commitment for transparency as the best guarantee of quality and reliability for our partners and customers.

ADVANCED CONTROL SYSTEM

The W3000 control unit with liquid crystal display (LCD) is fitted on all the units with a multi-language user interface, available as remote key pad for a remote connection up to 500 metres.

The Internal Clock manages a weekly schedule organised into time bands in order to optimise unit performance in IT applications units work 24/7.

Up to 10 daily time bands can be associated with different operating setpoints.

Supervision can be easily developed via proprietary devices or the integration in third party systems by means of the most common protocols as ModBus, Bacnet and Echelon LonWorks.

ELECTRONIC EXPANSION VALVE

The use of the electronic expansion valve extends the operating conditions even with external temperature seasonal limits.

All the models of the NX-Y/CA high efficiency version and NECS-Y with a cooling capacity over 350kW make use of electronic valves as standard, for all sizes.

This component brings significant benefits, especially with variable loads and different outdoor climate conditions.

In these specific cases it is possible to make the system independent of continuous calibrations, thus adapting the process to different load conditions in a completely autonomous mode.

Three sound emission levels

NX-Y range features three different sound emission levels for each energy class. This means the best unit can be identified according to its requirements that depends on where the system will be installed and what the application is.

K: liquid chiller with standard efficiency, compact version

LN-K: liquid chiller with standard efficiency, compact and low-noise version

SL-K: liquid chiller with standard efficiency, compact and super low-noise version

CA: high efficiency liquid chiller, compact version

LN-CA: high efficiency liquid chiller, compact and low-noise version

SL-CA: high efficiency liquid chiller, compact and super low-noise version

With the new NX-Y liquid chillers there are no more compromises when choosing the features, high efficiency and low noise can exist side-by-side without having to relinquish one or the other.

Extended operating limits

The full range of Climaveneta liquid chillers can operate in the most extreme environmental conditions.

All sizes and versions can work at full load up to +46°C outdoor temperature, always ensuring premium levels of energy performance. In addition, the high efficiency CA versions are able to operate in these conditions even in low-noise mode, finding their natural position in urban centres where the most restrictive environmental constraints in terms of noise occur. The new units are also able to ensure leaving water temperatures down to -12°C and, with certain precautions for the very low outdoor temperature, this range represent the ideal solution for most demanding IT Cooling processes.

Accessories:

- ▶ Microchannel coils with e-coating protection
- ▶ Traditional coils with copper tubes and aluminium fins, also available with prepainted fins or Fin Guard Silver protective treatment.
- ▶ Copper-Copper heat exchanger coils
- ▶ Compressor power factor correction
- ▶ Soft start
- ▶ Compressor suction and discharge valves
- ▶ High and low pressure gauges
- ▶ DVVF and DVV2F devices for low air temperature operation
- ▶ Hydronic group with possible storage tank
- ▶ Anti-intrusion grills

Notes:

1 Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.

2 Values in compliance with EN14511-3:2013.

3 Average sound pressure level at 10m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.

4 Sound power on the basis of measurements made in compliance with ISO 9614.

5 Sound power level in cooling, outdoors.

6 Unit in standard configuration/execution, without optional accessories.

7 Seasonal energy efficiency of high temperature process cooling [REGULATION (EU) N. 2016/2281]

8 Seasonal Energy Efficiency of Process Cooling at Medium Temperature [REGULATION (EU) N. 2015/1095]

9 Seasonal space heating energy index

The units highlighted in this publication contain HFC R410A [GWP₁₀₀ 2088] fluorinated greenhouse gases.

Notes:

1 Plant (side) cooling exchanger water (in/out) 12°C/7°C; Source (side) heat exchanger air (in) 35°C.

2 Values in compliance with EN14511-3:2013.

3 Seasonal space heating energy index

4 Seasonal energy efficiency of high temperature process cooling [REGULATION (EU) N. 2016/2281]

5 Plant (side) cooling exchanger water (in/out) 16°C/ 10°C; Source (side) heat exchanger air (in) 35°C.

6 Plant (side) cooling exchanger water (in/out) 23°C/ 15°C; Source (side) heat exchanger air (in) 35°C.

7 Average sound pressure level at 10m distance, unit in a free field on a reflective surface; non-binding value calculated from the sound power level.

8 Sound power on the basis of measurements made in compliance with ISO 9614.

9 Sound power level in cooling, outdoors.

10 Unit in standard configuration/execution, without optional accessories.

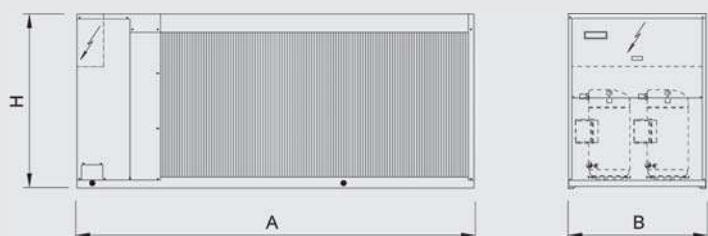

The units highlighted in this publication contain HFC R410A [GWP₁₀₀ 2088] fluorinated greenhouse gases.

Power supply	V/ph/Hz	400/3/50	400/3/50	400/3/50	400/3/50	400/3/50
PERFORMANCE						
COOLING ONLY (GROSS VALUE)						
Cooling capacity	(1) kW	370	394	440	481	522
Total power input	(1) kW	119	126	142	154	167
EER	(1) kW/kW	3,11	3,12	3,11	3,12	3,12
ESEER	(1) kW/kW	4,57	4,56	4,44	4,54	4,58
COOLING ONLY (EN14511 VALUE)						
Cooling capacity	(1)(2) kW	369	393	438	480	520
EER	(1)(2) kW/kW	3,07	3,08	3,06	3,08	3,08
ESEER	(1)(2) kW/kW	4,38	4,39	4,27	4,39	4,40
Cooling energy class		B	B	B	B	B
ENERGY EFFICIENCY						
SEASONAL EFFICIENCY IN COOLING (Reg. EU 2016/2281)						
Process refrigeration at high temperature						
Prated,c	(7) kW	369	393	438	480	520
SEPR HT	(7)(9)	5,52	5,43	5,17	5,45	5,61
SEASONAL EFFICIENCY IN COOLING (Reg. EU 2015/1095)						
Process refrigeration at medium temperature						
Prated,c	(8) kW	201	215	244	262	280
SEPR MT	(8)(9)	3,54	3,42	3,22	3,44	3,58
EXCHANGERS						
HEAT EXCHANGER USER SIDE IN REFRIGERATION						
Water flow	(1) l/s	17,72	18,85	21,05	22,99	24,94
Pressure drop	(1) kPa	41,9	35,9	44,8	32,9	38,7
REFRIGERANT CIRCUIT						
Compressors nr.	N°	4	4	4	5	6
No. Circuits	N°	2	2	2	2	2
Refrigerant charge	kg	53,0	67,0	67,0	77,0	81,0
NOISE LEVEL						
Sound Pressure	(3) dB(A)	53	53	53	54	54
Sound power level in cooling	(4)(5) dB(A)	86	86	86	87	87
SIZE AND WEIGHT						
A	(6) mm	6255	6255	6255	7430	7430
B	(6) mm	2260	2260	2260	2260	2260
H	(6) mm	2450	2450	2450	2450	2450
Operating weight	(6) kg	3490	3700	3730	4400	4650

NECS-Y / SL-CA		2015	2116	2316	2416	2418
Power supply	V/ph/Hz	400/3/50	400/3/50	400/3/50	400/3/50	400/3/50
PERFORMANCE						
COOLING ONLY (GROSS VALUE)						
Cooling capacity	(1) kW	550	592	638	662	695
Total power input	(1) kW	177	189	204	213	223
EER	(1) kW/kW	3,11	3,13	3,12	3,11	3,12
ESEER	(1) kW/kW	4,52	4,60	4,59	4,53	4,58

H	(6) mm	2450	2450	2450	2450	2450
Operating weight	(6) kg	4510	4990	5360	5360	6100

for a greener tomorrow

Eco Changes is the Mitsubishi Electric Group's environmental statement, and expresses the Group's stance on environmental management. Through a wide range of businesses, we are helping contribute to the realization of a sustainable society.

MITSUBISHI ELECTRIC HYDRONICS & IT COOLING SYSTEMS S.p.A.
